Summary

Finance and analytics candidate with hands-on experience building data pipelines, dashboards, and automated reporting workflows using Power BI, Excel, and AI tools including the Claude API. Proven ROI-driven project delivery – including a projected Rs. 47.5 Lakh annual cost saving through a supply-chain redesign – combined with budget-conscious execution across event and vendor operations. Award-winning team lead across national hackathons (IIT Bombay Techfest, TCS Foundation, IIIT Delhi) with strong cross-functional and stakeholder coordination experience.

Education

BBA, Digital Business & Entrepreneurship (DBE) 2026 – 2029
Indian Institute of Management Bangalore

Experience

AI & Disaster Analytics Intern 2025 – Present
Center for Disaster Management, IIT Guwahati

- Built automated data pipelines consolidating social media, government, and public-source data into real-time risk-monitoring dashboards, applying the same reporting-automation and data-consolidation approach required for business performance tracking.
- Curated NLP-ready datasets for pre-disaster preparedness models, working across multiple inconsistent data sources into clean, analysis-ready outputs.

Founder & Product Lead, ShikshaShakti.AI 2025 – Present
Adaptive AI learning platform for JEE/NEET aspirants

- Built a question-generation engine on the Claude API spanning 233 chapters and 157 prerequisite relationships, demonstrating applied, hands-on use of AI tools for workflow automation.
- Designed an offline-first architecture for low-bandwidth classrooms, balancing product scope against resource constraints.

Core Coordinator, Event & Logistics Management (Internship) 2024 – 2025
CSVTU-FORTE (DST–NIDHI i-TBI Incubation Centre)

- Managed vendor coordination and budget-conscious execution for startup incubation and mentoring programs – tracking costs against plan and flagging variances to stay within allocated budgets.

Core Coordinator, Event Management & Company Outreach Lead 2024 – 2025
Training & Placement Cell, CSVTU Bhilai

- Led corporate outreach and vocational training allocation for placement drives, coordinating directly with external partners, staffing, and administrative stakeholders.

Projects

PackEdge 2025: Supply Chain Cost Redesign, Godrej Interio (Team Lead) 2025
Winner, IIT Bombay Techfest

- Designed a Partial Knock-Down packaging model that reduced packaging volume by 18.5%, reduced freight cost by 33%, and projected Rs. 47.5 Lakh in annual savings – direct ROI modeling and cost-impact analysis.

CryptoTrace LEA: Real-Time Crypto Fraud Attribution System (Team DevOps 2.0) 2026
Smart India Hackathon 2026, Ministry of Home Affairs (PS 26183)

- Built a multi-chain tracing engine and a 7-component risk-scoring model; 129/129 tests passing – demonstrates rigorous, structured analytical methodology.

FDR-Setu: Regulatory Fintech Platform for Security Deposit Lifecycle (AICTE) 2026
Smart India Hackathon 2026, All India Council for Technical Education

- Built a platform with 55 REST endpoints and 26 data tables covering deposit renewals, release workflows, and two-phase settlement – strong exposure to financial-process and compliance logic.

NextGenAML: Graph-Based AML Fraud Detection Platform (Team Lead) 2026
Winner, TCS Foundation 36-Hour National Hackathon, NIT Tiruchirappalli

- Built a GNN/XGBoost/FATF rule ensemble that reaches ROC-AUC 0.78 on fraud-risk triage.

Financial Fraud Detection & Real-Time Customer Alert System (Team Lead) 2026
Finalist, Fintechstico 2026, NSUT Delhi

- Build an end-to-end pipeline that stops suspicious transactions and triggers multilingual real-time alerts.

Achievements

- **Winner:** TCS Foundation 36-Hour Hackathon (NIT Tiruchirappalli) | PackEdge, IIT Bombay Techfest | Hack-LLM, IIIT Delhi
- **Top 100 in India:** Union Bank of India iDEA 2.0 AML Challenge | **Top 20:** Young Leadership Summit, IIM Bangalore
- **Finalist:** SANGYAN Hackathon (IIT BHU) | MUJ Hack 4.0 | Fintechstico 2026 | AVANT B-Plan (IIM Indore) | SIPS 2026 (IIM Bangalore)
- **Certified:** E-SDP in Drone Technology, Ministry of MSME, Government of India (2025)

Skills

Data & Reporting: Power BI, Excel, Data Pipelines, Data Analysis, Financial Analysis, ROI Modeling, KPI Definition, Reporting Automation, Dashboard Design
Office & Productivity: Microsoft Excel, PowerPoint, Word, Outlook
AI & Tools: Claude API, LLM Fine-Tuning, Machine Learning, GNN, NLP, XGBoost, GenAI Applications
Engineering: Python, FastAPI, React, Neo4j
Business: Budget Tracking, Vendor Coordination, Stakeholder Management, Cross-Functional Coordination
